

DispenseIQ · Dispensing target sheet

Print at 100 % scale on A4 (no 'fit to page'). One drop per ring. Photograph top-down with the whole sheet in frame.

Row A

6 mm target

dashed = +25 %

Row B

8 mm target

dashed = +25 %

Row C

10 mm target

dashed = +25 %

Row D

12 mm target

dashed = +25 %

How to read a photo of this sheet

Solid ring = target dot diameter. Dashed ring = +25 % tolerance. A drop past the dashed ring reads as oversized; well inside the solid ring as undersized; an empty ring as a missing dot.

Suggested take (Row B): five drops on target, one deliberately large, one starved, one ring left empty — then photograph and upload. Use tinted water for size/missing shots, honey or diluted glue for stringing.

Even light, no flash, camera square to the sheet. Keep the 50 mm bar and row labels in frame so scale is verifiable.
